

## SERIES ONE - HIGH RESOLUTION INK JET PRINTER FOR POROUS AND NON-POROUS APPLICATIONS

The POLYtjij<sup>®</sup> series printers can print onto most porous and non-porous substrates available in the world of the packaging industry today. Combined with amazing features such as a 5" full touch colour screen, smart detect external devices, stand alone or PC multiprinters control, the POLYtjij<sup>®</sup> series one printer offers exceptional value for money from this fully featured inkjet printer.

**5 inch LCD Touch Screen**  
5inch 800\*480 color LCD touch screen, New touch screen interface, Stand-alone operation, no PC required

**Variable Barcode**  
Support variable barcode prints

**High Resolution**  
High resolution up to 600DPI

**Multi-Functional Port**  
DB15: For external photocell, synchronizer or alarm kit connection, no additional accessories

**Vector Font Editor**  
Support editing function of multiple fonts

**Smart Detect**  
Smartly detect the external devices; available for external photocell, synchronizer or alarm kit connection

**PC-Multiprinters Control**  
Multi-function PC software, realise the multiple device synchronisation control makes management easier

**Smart Ink**  
Realises synchronized control of multiple devices, makes management easier

## SERIES TWO - HIGH RESOLUTION INK JET PRINTER - HUMAN BODY BIONICS DESIGN

The POLYtjij<sup>®</sup> series two mobile printers enable you to print onto static substrates with ease. Combined with amazing features such as an easy to use 5" full colour touch screen, human body bionics design & reasonable equipment centre of gravity, long time usability is assured.

Human bionics design and reasonable equipment center of gravity, ensure a long time usability

Comes with a proprietary air box, printing accessories readily available

Standard equipped of 2pcs large-capacity rechargeable battery. More than 300 cycles of using frequency. Longer than 6 hours of continuous printing

Unlimited printing anywhere and anytime

## SERIES THREE - TWO PRINTHEADS 1 INCH PRINT

The POLYtij® series three printers can print onto most porous and non-porous substrates available in the world packaging industry today.

Combined with amazing features such as a 7" full touch colour screen, smart detect external devices, stand alone or PC multiprinters control, the POLYtij® series three printer offers exceptional value for money from this fully featured inkjet printer.

With two stitched print heads, Print Heights can reach 1 inch (25.4mm)

Print heads and the controller can separately print two half inch

Through port of USB, Ethernet and Rs232, printer can integrate with the external data

Smart detection of external substrates with built-in photocell in print heads

7 inch brand-new color LCD touch screen

With Aviation connector to achieve high reliability and easy installation for bidirectional printing

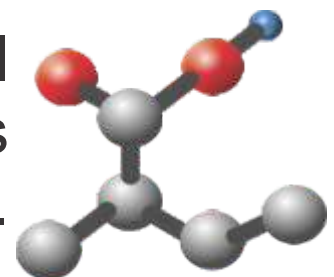

PC software supports the timely printing of data of MS Excel, MS Access, SQL2000, SQL2005, SQL2008 etc...

Automatically recognize the ink types and identify the optimum printing parameters

An evolution in thermal  
non porous  
inkjet printing.
